Q3

If you could build an app to track your statistics and help you practice, what would you want in you "Personal Dashboard"? (i.e. handicap over time, putts per round over time, etc.) Anything else you would throw in there?

KPIs for improving my game. a youtube i follow, sidekick, recommends a 6/6/6 rule for breaking 70's. 6 GIR, 6 up and downs par or better, 6 holes over par. a dashboard to track those metrics would be cool. if i wanted to increase distance it would be metrics around last 5, last 10, last 100 shots. that would show trends and progress over time. shooting from the hip here but in general the information should be actionable and change behavior towards some objective. otherwise what's the point?

not too complicated for an app but easy to reference with 1 or 2 views.
